What is this about?

The project aims to improve the well-being and safety of migrant workers by encouraging employers to use effective e-learning content as part of a blended training approach to Health and Safety.

Who is involved?

This is a partnership between three European educational institutions working with local SME's and potential migrant workers.

What will we do?

We will identify and evaluate e-learning content and tools that support Health and Safety training. On that basis, we will analyse them and compare these on a European level.

Why we need you

To be able to carry out this European project with the best results, we kindly ask your contribution in this project.

The partners are:

Szybinski High School, **Poland**
